CAPABILITIES STATEMENT

Company Overview

- aLocal offers comprehensive economic advising services, software development and net economic impact analysis (netEI) through its market and economic analytics software, aLocal Development. The software is equipped with the innovative technology to aggregate and interpret data in ways that serve unique economic needs while providing #dataequity. aLocal uses proven algorithms focused not only on macro-economic impacts but understanding how multiple systems in the community and the surrounding areas help predict economic demand in your community.

Market Analysis/Market Consultation

- aLocal offers an AI based market and economic demand software to provide any business (2 digit to 6 digit NAICS codes) for any region (Zip Code, City, County, Reservation, MSA, Congressional District) in the US in seconds. Whether you're building new housing developments, researching prospects for a retail business in a nearby city, or increasing your knowledge about trends in population levels, ScenarioBuilder© provides the opportunity to analyze the impacts of future decisions and how they may impact certain geotargets or Zip Code Tabulation Areas of consideration.

API Integration/Software Development

- aLocal utilizes a seamlessly integrated application-programming interface (API) in all of its software programs to generate real-time, easy-to-understand analytics and reports.

netEI/Economic Impact/Planning & Economic Development/Financial & Business Consulting

- It is impossible to plan for the future economy of your community without understanding the economic impact on the existing conditions of the system. Our powerful analytics allow you to see, on maps and tables, where there is current economic impact, demand (or not) as well as possible outcomes for future changes in our community. This includes increased multi-family housing, economic growth, possible zoning changes and employment. We also forecast financial data, including profit/loss statements and balance sheets.
